CN-Lab-3 - Interface Routing.

- 1) Creating a multiple router topology by connecting routers through serial ports & PC's through fast ethernet
- 2) Assigning ip addresses
- 3) Pinging PC1 from PC0 gives 'dest port unavailable'
- 4) use 'show ip route', then add static addresses using `ip route <dest> <subnet> <next hop>`
- 5) Ping PC1 to PC0, or vice versa
