Lab 2 - Computer Networks:

→ A Topology was built with 2 end devices & router commented the 2 devices thru cables.

→ Devices were configured to their respective ip addresses.

→ Router is configured with the respective interfaces & ip addresses

=> commands:

> enable
> configure terminal
> interface fa%0
> ip address 10.0.0.1 255.0.0.0
> no shutdown
> exit

→ The Ping is made & TTL Changes are observed.
